ICS 440 Homework Format

1. Homework Header

The homework should have a header in the top of the first page like this:

> ICS 440 – Howework N
> CSN – Student's Name
> Attempted: X of Y
> Date

Notes:
1. Write the homework number, N. For example, **ICS 440 – Homework 1**
2. CSN is your class serial number, which is assigned to you by the instructor in Week 3 (No CSN for small sections, use your ID instead).
3. Write your Name as spelled in the class by the instructor.
4. Attempted X indicates how many exercises you have attempted and Y is the total number of exercises. If the exercise has two or three parts, and you only solve one part, add 0.5 or 0.33 to X respectively. Recount and update X if needed before saving the file as PDF.
5. Write the date on which you finish the homework (the PDF creation date).
6. Wrong or inaccurate formatting will result in a deduction of the total score.
7. The homework should be submitted online through blackboard in a PDF file. The file name should be in this form: **hwN.csn##.pdf**, where N is the homework number and ## is your CSN (e.g. **hw1.csn02.pdf**).
8. Make sure to verify your submission.

2. Question Header

Each question or exercise has its own header with a unique question number Q#. Write your answer under the header. The question header format is as follows:

> **Q# Stalling §Sec# Exer #**

Notes:
1. **Q#** is the question number, which is sequential based on the order of the exercise as listed in each homework assignment. If you solve the exercises in different order, make sure you sort them according to the order given on the Assignments page to maintain correct numbering.
2. The exercises by default are from the textbook, by Stalling. **Sec#** is the book chapter/section number, and **Exer #** is the exercise number. An example of a header could be like this:

> **1 Stalling §1 Exer 4**

Please see the HW-Sample for more details.
